- Additional stack: Amplify, AWS (EC2, Lambda, DynamoDB, S3, Cognito, Predictions and Transcriptions), Lodash.js, Immutable.js, moment.js, redux-forms.js, react-router.js, i18n.js
- Also familiar with: Backbone.js, Angular.js, Firebase console, SCSS, C#, ASP.NET, SQL and WCF
- Tools: GIT, Jira, Trello, Zeplin, Github, Gitlab, Bitbucket, Fabric (Crashlytics)

WORK EXPERIENCE

Causal Engines

(Dec 2020 — May 2021)

Lead FullStack Engineer

A Venture Studio who builds startups from scratch and help existing startups to grow

<https://www.causalengines.com/>

Tech Stack: React, Redux, NextJS and MongoDB

Responsibilities:

- Built whole architecture from scratch for calendar event based stealth app
- Daily code submission for conversion of design to actual UI
- Write APIs, maintain server and handle database to support active users
- Integrate 3rd party SDKs and APIs

BestBeing

(Aug 2019 — Dec 2020)

Principal Architect

An AI based wellness platform for individuals and enterprises for their employees to connect with providers to achieve their life goals

<https://bestbeing.com/>

Tech Stack: React, Amplify, AWS (Lambda, DynamoDB, Cognito, S3, Predictions and Transcriptions), Redux, Node, Express

Responsibilities:

- Brainstorm new features, plan them and execute them
- Maintain and improve code quality, product quality and user experience
- Mentor technical team
- Daily code submission and code reviews

Vyoo.me

(Dec 2018 — Aug 2019)

Frontend Consultant

Android and iOS applications for a Social media platform

<https://community.vyoo.me/>

Tech Stack: React, React-Native, Redux, Firebase console

Responsibilities:

- Implemented several social media features from scratch
- Important features: Connect with people, Create events, Find hangout places, Chat room, etc
- Fixing bugs and crashes, and implementing new features on daily basis
- Code reviews, daily stand-ups

Getsimpl

(Sept 2018 — Nov 2018)

Frontend Consultant

Android and iOS applications for Simpl (available on App store and Play store)

<https://getsimpl.com/>

Tech Stack: React, React-Native, Redux, Jest, Mocha, Chai

Responsibilities:

- Worked with Getsimpl as an owner of app side Billbox
- Implemented new features and fixed existing bugs in Billbox
- Added few animations for better user experience

Raja Software Labs

(Sept 2016 — June 2018) .

Lead Frontend Engineer

Client: **Nest Labs (Google)** for Nest IOT product dashboard

<https://home.nest.com>

This was a project with complex architecture and huge amount of technologies involved.

Tech Stack: React, Redux, Backbone, React-Router, Redux-form, Backbone, Lodash, Moment, Immutable, i18n

Responsibilities:

- Represented a team (4-6 devs) to client
- Shipped all features within deadlines with NO regressions
- Organised daily standup meetings
- Synced up with all other related teams and people (Product manager, Nest developers, other platform developers, UX designers and QAs)
- Was involved in design and architecture level decisions
- Mentored new joiners and on-boarded them to the project

Cognizant Technology Solutions

(Oct 2014 — Sept 2016)

Programmer Analyst

Client: **JP Morgan and Chase**

Shipped several Web and Windows applications, and Console automators.

Tech Stack: C#, ASP.NET, JavaScript, SQL Express

Responsibilities:

- Individual contribution for requirement gathering and software development
- Attention towards security and risk factors while development
- Client interaction for requirement gathering and documentation

PERSONAL WORK

Android app for a digitally transformed childhood game called Square block (originally known as lines and dots)

<https://play.google.com/store/apps/details?id=com.squareblocks>

Primary stack: React, React-Native, Node, Express, AWS EC2

Special mention: Single player Bot plays amazing. Most of the players have not been able to beat it yet.

Chrome extension for Ad-free experience on Youtube and YouTube music

<https://chrome.google.com/webstore/detail/ad-free-youtube/loaoebojmkjpcjabkcgghbcdggjemhkpe>

Primary stack: JavaScript, HTML, CSS

Template for Projects owned by a company on Github

<https://rushikeshbharad.github.io/facebook-projects/>

Primary stack: React, Redux, Rxjs, Redux-observables, CSS and JavaScript (ES6+)

Online CV (updated a couple years ago):

<https://rushikeshbharad.github.io/portfolio/>

Primary stack: React, CSS, Javascript(ES6+)

Template for Flight booking web application

<https://rushikeshbharad.github.io/Flight-booking/>

Primary stack: React, Redux, CSS, Javascript(ES6+)

Web application which guesses the number in your mind:

<https://rushikeshbharad.github.io/Guess-27/>

Primary stack: React, CSS, Javascript(ES6+)

EDUCATION

Bachelor of Engineering

VIT, Pune

Secured an aggregate of 75.69%

August 2010 — June 2014

HSC

Apte Prashala, Pune

Secured 86.5%

June 2009 — April 2010

SSC

Gandhi Vidyalaya, Parbhani

Secured 90.61%

June 2007 — April 2008
